

## I. Introduction

Welcome to the West Midlands Police Station !

You have passed the police entrance exams, and you can start your law enforcement career as a trainee. Many brilliant police officers have started their career here, just like you.

Most of you come from different regions and are not familiar with the West Midlands, which is why you can find in this dossier a map of our town, West Bromwich, to find your way around.

The police station is located on Moor St., West Bromwich.

Our building has recently been renovated so as to offer you excellent working conditions.

## II. Your training course

You will now carry out your first investigation. D. I. Chartier will be your supervisor: she will help you with the crime laboratory (analyzing DNA, fingerprints, ballistics...) and will be your guide throughout the investigation.

During this investigation, you will be divided into groups of 4 trainee constables.

You will have to **be observers in order to collect and analyse the clues** which will lead you to the murderer.

All the people or suspects you will interrogate know essential information, but you will have to **ask the right questions**.

You must keep in mind that you are bound to professional secrecy.

And do not forget our motto:

**Serving our communities, protecting them from harm**
